Protective Clothing

# A Wide Variety of Face Masks

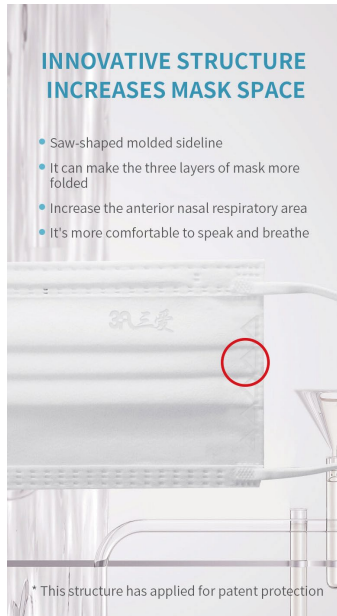

Our masks are designed for comfort and made with high-quality fabric to offer high-density isolation. With triple-layered protection, our masks are capable of isolating invisible particles and pathogens with the smallest diameter. Such precision has always allowed us to gain excellence in the stream of manufacturers and producers of triple-layered face masks.

3A Sanai Health offers a triple-layered, anti-smog, anti-odor, and dustproof face mask with super soft natural quality fabric. These are exceptionally crafted to suit one's face well, giving them a good fit and comfort for a longer duration and to meet daily-wear requirements.
