Medical Grade Nitrile Gloves

Ultra thin technology, precise touch

Our medical-grade nitrile gloves are produced by using world-class thin technology and the stretch formula. Such gloves provide precise tactile sensation while dealing with patients in a hospital setting.

Our gloves have a 100% nitrile composition which is a synthetic material that prevents allergic reactions to the skin. This one also acts as a barrier against the chemotherapeutic agents that are delivered to the patients.

Our gloves are super comfortable and are known to provide dependable protection. They give latex feel type while eliminating the risk of latex allergy.

Features

1. Made out of Nitrile Butadiene Rubber
2. Highly flexible
3. Super comfortable
4. No allergic reaction
